CONSULTANT:

PMU

DESIGN & BUILD SOLUTIONS

www.okyanusgrup.com

Founded in 1993 Yalitim Çözümleri is a respected "Global Shell Contractor" with a wide range of expertise and experience in the construction sector.

Yalitim Çözümleri provides a full and complimentary range of products and services to clients and by drawing upon the Okyanus Grup's extensive resources and is able to provide specialist skills for projects when required. Access to diverse professional roofing, cladding, glazing, refurbishment and maintenance expertise produces cost-effective and innovative design solutions that generate high volumes of repeat business. Yalitim Çözümleri is entirely committed to offering the best possible services.

Yalitim Çözümleri now has over 100 technically qualified staff working throughout the region. As a direct result of continued commitment to training. It has an "Approved Contractor" status with most of the leading roofing & cladding system suppliers

SHELL CONTRACTING

Shell Contracting includes every other work after the construction of the structural building core.

ROOFING

Roofing includes single-ply membrane, ETFE/PTFE tension roofing system and standing seam metal roofs.

FACADE

Facade includes industrial facade claddings, cold facade claddings, curtain wall and unitized facades claddings.

COMPLIMENTARY SYSTEMS

Complimentary systems includes syphonic rainwater drainage, smoke exhausts and energy efficient materials.

FACADE ENGINEER

www.nasakoma.com

Founded in 1999 Nasakoma is an "Engineered Facade Company" focusing on "Curtain Wall Systems" and all conventional and contemporary complimentary systems with its professional project, production and application teams.

Offering services such as project design, technical support, installation and installation and maintenance. Nasakoma operates as a Facade Contractor in all kinds of Metal Curtain Wall Systems (Unitized Facade System and Stick Facade Systems), Transparent Walls, Cold Facade, 3D Facade Tension Cable/Membrane Systems, Lightweight Shell Skylights, Free Form Systems, Sliding Systems.

As its motto, "Façade Engineer", Nasakoma focus on designing the engineering concepts and solving every detail structurally and esthetically complying the international standards. Nasakoma's partners and suppliers are also preferred among worldwide proven companies and producers of their sectors.

UNITIZED FACADE

We supply factory made unitized facade panels and properly pack them for international transportation to form the facade in situ in any global location.

STICK FACADE

We design and build conventional facade systems working in accordance with the world's leading aluminium facade and steel facade system producers.

TRANSPARENT WALLS

Whenever architects demand, we provide more transparency with the most contemporary facade technologies used in construction industry

COLD FACADE

We use environmentally friendly and technologically advanced materials from the globally recognized and independent laboratory tested and proven brands.

3D TENSION SYSTEM

We use technological textile and fabric systems to create esthetic 3D Forms as well as fine shelters.

SLIDING SYSTEMS

Our main concerns in sliding systems are silence, air & water tightness and fast, easy, long lasting operation.

FREE FORM SYSTEM

We provide three dimensional freedom for the aluminium or steel profiles to form the perfect skin of your design.

LIGHTWEIGHT SHELL SKYLIGHT

We make the sky over your project more visible with the high-end technologies of metals, glass and plastic foil elements.

PREMIUM CONTRACTOR

www.leeb.com.tr

Leeb is an "International Turnkey Contractor" with a reputation not just for its technical capability but also its collaborative work approach. Leeb has a solid reputation for timely completion of schemes , budget adherence and international level quality.

By Focusing on four key performance areas, Leeb has built a successful business based on recommendations from satisfied clients. Adhering to the BUDGET requires a balance between competitive pricing and a realistic approach to variations something that only experience can bring; the aim is to give value for money with no surprises in the final account. Leeb believes that QUALITY has as much to do with an attitude as it does with one's ability to achieve it. Realizing just how important completion dates are to the customer with experienced management, flexibility and genuine commitment to the client ensure that Leeb keeps to the customer's PROGRAMME in order to adhere to completion date. A commitment to SAFETY is a result of a genuine sense of responsibility to the workforce and not just a legal requirement.

TURNKEY CONSTRUCTION

From the early planning stages of a project through project closeout, Leeb combines all necessary expertise to offer the perfect construction service.

ENGINEERING

Leeb provides all the mechanical, structural and electrical engineering projects with its qualified and skilled engineering personnel.

ARCHITECTURAL DESIGN

Customer needs, context, environmental issues, energy efficiency and proper detailing are as important as aesthetics in Leeb's architectural approach.

FEASIBILITY STUDIES

Leeb is aware that all investments need the right feasibility studies which are done by experienced multi disciplinary professionals with the right insight.
